

Some quick notes:

Solving Equations 7

Combining Like Terms on Both Sides

Name: _____

1) $x - 9 + x = 3 - x + 6$

4) $12x + 13 - 2x = 10x - 4 + 9x - 10$

2) $-4x + 7 - 6x = 2x - 35 + 2x$

5) $20 + 3x - 30 = 5x + 20 - 9x + 5$

3) $4x + 6 + 8x = 20 + 4x + 50$

6) $3x + 20 + 2x + 20 = 10x - 10 - 25$

$$7) 4x - 5 + x = 8 + 3x - 1$$

$$9) 10x + 2 - 3x = 71 - 6x - 30$$

$$8) 51 + 12x + 49 - 2x = 20x + 40$$

$$10) 18 - 6x + 18 = 3x - 36 + 3x$$

WASN'T THAT FUN!
