

NAME _____

Using the X and Y axis with DATA!!!

There are many other names that people use to refer to the x and y axis. Identify 4 more.

x-axis

y-axis

When looking at a set of data that you want to graph, how do you distinguish which variable goes on the x axis and which goes on the y-axis?

Example:

Your boss has asked you to make a graph that helps him calculate how much money he owes you based upon the amount of hours you work. What are the two variables to be graphed here?

1. _____

2. _____

Distinguish which variable goes on the x axis? _____

Distinguish which variable goes on the y axis? _____

Domain and Range

Domain and range are words that also refer to the x and y variable in a situation.

Define Domain:

Define Range:

Example: Referring back the example above, distinguish what the domain and range would be.

Domain: _____

Range: _____

Now Try These.... Distinguish which variable is the Domain and which is the Range.

1. You are working on a school fund raiser involving t-shirt sales. You are asked to post a graph to illustrate the number of t-shirts that have been sold and the amount of money that has been made.

Domain: _____

Range: _____

2. The student council is sponsored a dance last month. You were asked to create a graph to illustrate the amount of money that was made and the number of students that attended the dance. You are going to be using this graph to report out at the meeting.

Domain: _____

Range: _____

3. You babysit for your neighbors and get paid hourly.

Domain: _____

Range: _____

4. You work at the local library and were assigned a task to keep track of the number of people that visit the library each hour. You need to create a graph to illustrate your findings.

Domain: _____

Range: _____
