

NAME _____

Families of Functions Practice

For exercises #1-16, use what you know about functions to...

- Sketch a picture of what you think each equation would look like if it were graphed. Will it be a line, a parabola, a hyperbola, a v-shaped graph...?
- Name what family each equation belongs to.

1. $y = 2x$

2. $y = x^2 + 2$

3. $y = \frac{2}{x}$

4. $y = \sqrt{x}$

5. $y = \frac{1}{x} + 2$

6. $y = x + 6$

7. $y = 2x^2$

8. $y = \frac{1}{x} - 2$

9. $y = 5\sqrt{x}$

10. $y = \frac{1}{x} + 2$

11. $y = 10^x$

12. $y = 2x^3 + 6$

13. $y = \frac{6}{x}$

14. $y = -x^3 + 2$

15. $y = 5^x$

16. $y = 3x - 8$

Check your predictions regarding what each graph looks like using a graphing calculator, then fix any mistakes.

For #17–30 , identify the name of the family of functions to which each graph belongs.
