

## Accelerated 7<sup>th</sup> Grade Learning Targets

	<b>Unit 2 Solving Equations and Inequalities</b>			
1	I can simplify expressions by combining like terms.			
2	I can simplify expressions by distributing and then combining like terms.			
3	I can apply the distributive property with rational numbers. (fractions especially)			
4	I can solve complex equations of one variable.			
5	I can solve complex real- life equations that include different kinds of rational numbers.			
6	I can solve an equation for any given variable. <i>Example: <math>F=ma</math>; solve for <math>m</math>; <math>m=F/a</math></i>			
7	I can estimate and use prior knowledge to make sure that my answer "makes sense" to the given question.			
8	I can write an inequality for a given situation.			
9	I can find the solutions to a given inequality.			
10	I can graph inequalities.			
11	Given a situation, I can write an inequality, graph, and interpret the solutions.			
12	I can interpret the solutions to an inequality.
